GOOD HEALTH SHOULD LAST A LIFETIME

CLINICAL TESTING

Back 2 Health offers the following scientific testing to yield an accurate status of your health. This can be recorded to help your practitioner target the areas of health that need attention. Clinical testing will give you an insight to your health and wellbeing; and you can be retested to monitor your progress. Diagnostic tests help to identify the causative factors behind the problem and to establish the correct healing procedures that promote fast elimination of your symptoms and causes.

CELLULAR HEALTH ANALYSIS

Cellular Health Analysis is a scientifically validated test that accurately measures the biological “markers” of ageing such as fat mass, muscle mass, biological age, cellular toxicity, cellular fluid levels, and cellular vitality.

Cellular Health Analysis measures fat to lean muscle ratio, the level of hydration of your cells and the toxicity level of your body. This test gives a good indication of your cellular health and how effectively your body is functioning.

It will give an indication of your chronological age against your cellular age.

30min :\$50.00 Follow up,15min :\$15.00
